James,

Please add this information to the H and S plan as an amendment on the sheet you printed off so this information is documented. Thanks, _____

Subject: Landfill gas site safety measures.

Feezor will be monitoring for VOCs and other landfill gases with a PID, explosive meter and O2 meter as necessary. As EPA personnel won't be directly involved in clearing, grading, or GCPT operations, our own equipment may not be necessary to bring to the site at this time.
